*Allergens

Lavender

Lavender's properties help ease skin conditions and are commonly used to optimise the rejuvenating process.

Glycerine

Glycerin is described as having humectancy (the ability to attract and hold moisture from the air). This further aids in the product's capacity to create a moist environment.

Rosemary

Helps to soothe blemishes while increasing the natural shine and hydration of skin.

Rosehip Oil

Essential fatty acids help regeneration of skin cells and damaged skin tissue.

Panthenol (Provitamin B5)

A water-soluble member of the B Complex Vitamins, noted for its ability to deeply moisten and hydrate the skin.

Centipeda cunninghamii

Commonly used to treat skin irritations, helps to relieve itching and dry skin, as well as having soothing properties.

Aloe Vera

Soothes skin irritations and moisturises.
